

Fall Fireplace Sale!

Tell Old Man Winter to take a hike, he is no match for your High Efficiency gas fireplace from G&B Energy!

Hurry in for these great offers

FREE PROPANE FOR YOU!

Receive 100 Gallons of Free Propane or a Free Thermostat Remote with the purchase of any Kozy Heat, Lennox, Hearthstone, Regency or Vermont Casting Fireplace or Insert*

FREE REMOTE CONTROL

Purchase any gas log set priced \$550 or more and receive a FREE on/off remote control

We Put the PRO in PROPANE!

PROFESSIONAL :: Delivery, Service & Installation

www.gbenergy.com

REMOTE READY GAS LOGS STARTING at \$375

Promotion cannot be combined with any other offers or discounts and is not valid on previous purchases. G&B Oil Co., Inc reserves the right to discontinue this promotion with out notice. To qualify for FREE PROPANE, you must become an Auto Fill customer and purchase a direct vent unit. Offer not valid on close-out or discounted fireplaces. Other restrictions may apply! OFFER EXPIRES 11-30-13

Important Propane Safety Information for You and Your Family

! IF YOU SMELL GAS

- 1. NO FLAMES OR SPARKS!** Immediately put out all smoking materials and other open flames. Do not operate lights, appliances, telephones, or cell phones. Flames or sparks from these sources can trigger an explosion or a fire.
- 2. LEAVE THE AREA IMMEDIATELY!** Get every one out of the building or area where you suspect gas is leaking.
- 3. SHUT OFF THE GAS.** Turn off the main gas supply valve on your propane tank if it is safe to do so. To close the valve, turn it to the right (clockwise).
- 4. REPORT THE LEAK.** From a neighbor's home or other nearby building away from the gas leak, call your propane retailer right away. If you can't reach your propane retailer, call 911 or your local fire department.
- 5. DO NOT RETURN TO THE BUILDING OR AREA** until your propane retailer, emergency responder, or qualified service technician determines that it is safe to do so.
- 6. GET YOUR SYSTEM CHECKED.** Before you attempt to use any of your propane appliances, your propane retailer or a qualified service technician must check your entire system to ensure that it is leak-free.

CAN YOU SMELL IT?

Propane smells like rotten eggs, a skunk's spray, or a dead animal. Some people may have difficulty smelling propane due to their age; a medical condition; or the effects of medication, alcohol, tobacco, or drugs.

ODOR LOSS. On rare occasions, propane can lose its odor. Several things can cause this.

! Since there is a possibility of odor loss or problems with your sense of smell, you should respond immediately to even a faint odor of gas.

APPLIANCE MAINTENANCE

LEAVE IT TO THE EXPERTS. Only a qualified service technician has the training to install, inspect, service, maintain, and repair your appliances. Have your appliances and propane system inspected just before the start of each heating season.

DO NOT TRY TO MODIFY OR REPAIR valves, regulators, connectors, controls, or other appliance and cylinder/tank parts. Doing so creates the risk of a gas leak that can result in property damage, serious injury, or death.

RUNNING OUT OF GAS

! DON'T RUN OUT OF GAS. SERIOUS SAFETY HAZARDS, INCLUDING FIRE OR EXPLOSION, CAN RESULT.

- If an appliance valve or a gas line is left open, a leak could occur when the system is recharged with propane.
- If your propane tank runs out of gas, any pilot lights on your appliances will go out. This can be extremely dangerous.
- **A LEAK CHECK IS REQUIRED.** In many states, a propane retailer or a qualified service technician must perform a leak check of your propane system before turning on the gas.

CO AND YOUR SAFETY

WHAT IS CARBON MONOXIDE (CO)? You can't taste or smell CO, but it is a very dangerous gas. High levels of CO can come from appliances that are not operating correctly, or from a venting system or chimney that becomes blocked.

CO CAN BE DEADLY! High levels of CO can make you dizzy or sick. In extreme cases, CO can cause brain damage or death. Symptoms of CO poisoning include: headache, dizziness, fatigue, shortness of breath, and nausea.

CO DETECTORS CAN IMPROVE SAFETY. For an extra measure of safety, consider installing a CO detector listed by UL on each level of your home.

! IF YOU SUSPECT CO IS PRESENT, ACT IMMEDIATELY!

1. If you or a family member shows physical symptoms of CO poisoning, get everyone out of the building and call 911 or your local fire department.
2. If it is safe to do so, open windows to allow entry of fresh air, and turn off any appliances you suspect may be releasing CO.
3. If no one has symptoms, but you suspect that CO is present, call your propane retailer or a qualified service technician to check CO levels and your propane equipment.

Gas Heaters

HeatStar

FUEL : Propane
BURNERS : Infra Red
BTU : 20k
Heats up to 600 plus sq.ft.
